Application No. 10/597,509 Attorney Docket No. 22727/04421 Response to Non-Final Office Action

## Amendment to the Specification

Please replace paragraph [026] with the following:

Figure 7 shows <u>a</u> comparative cDNA sequence (SEQ ID NO: 6) and amino acid sequence (SEQ ID NO: 1) of murine VEGF<sub>205\*</sub> isoform. The highlighted area shows the signal sequence of 78 nucleotides and 26 amino acids. The entire sequence of VEGF is 171 amino acids -- the signal sequence of 26 amino acids is cleaved from the mature VEGF<sub>205\*</sub> polypeptide. The presence of the stop codon TAA results in a truncated protein of 145 amino acids. Numbering of the nucleotide and amino acid sequence for murine VEGF<sub>205\*</sub> is shown.
